Council Lounge Chair

The Council Lounge Chair is a lower and slightly reclined version of the original Council Chair. The Council Chair was designed in 2011 by Kasper Salto and Thomas Sigsgaard for the Trusteeship Council Chamber at the U.N. Headquarters in New York. The chair is well-thought out, shaped with the human body in mind and made in form-pressed patented 3D veneer in oak or walnut. The chair is upholstered in leather or textile.
